

# ICT at Baradene

Let your ideas flow by using digital inking!  
Draw on your touchscreen with your finger or a stylus.

As a **Microsoft School**, we use M365 apps as our platform for teaching and learning.

In Year 7, your daughter's classes will cover cyber safety, Microsoft Office applications, and more. Our goal is for Baradene students to become confident, 21st-century learners.

## BYOD Device:

We have some specification requirements to ensure that the students have a BYOD device that best serves their needs and the teachers' ability to assist them at Baradene College.

- **Touchscreen with Stylus/Pen**
- **Windows Operating System**

We recommend a device with 8GB RAM or more, a fast processor (e.g. Intel i5, Ryzen 5), a screen size of at least 12 - 13" and a good battery life that lasts a typical school day (approx. 6 hours). Baradene College runs Windows across the school which is why this is preferable, so the students and teachers are using the same Operating System.

## BYOD recommendations.

**Lenovo IdeaPad Flex 5 Flip**  
14" i5 8GB RAM 512GB  
Windows 11  
Approx \$1099

Note: Stylus sold separately.

**HP Envy x360 Flip**  
14" i5 8GB 512GB  
Windows 11  
Approx \$1299

Note: Stylus sold separately.

**Lenovo IdeaPad Flex 5 Flip**  
14" Ryzen7 16GB 512GB  
Windows 11  
Approx \$1499

## Support

At the beginning of the school year, there is time set aside to help all new students download Microsoft 365 and set up their devices with their username and password. We will provide assistance and instruction to enable your daughter to connect to the school wireless network.

Our New Era ICT technicians will be able to assist students with problem-solving or troubleshooting during lunch times, morning tea and before school.
